Our History

Commercial & Industrial Cleaning Supplies (Wholesale) CC or 'CICS' was founded in 1905 with premises in Loop Street, Cape Town, and in Kimberley. The company's current name was adopted in 1956 with a change of ownership and the launch of the now well-known **Exitol** products. In a small room with three tanks, dishwasher, bleach, detergents, and disinfectant products were produced by Duncan Thom and Oscar Viret under the ownership of John Douglas-Hamilton, who went on to run the company for more than 40 years.

Today, the company is still owner operated albeit at a new location in Epping 2 under the ownership of Koos Steenekamp who joined the company in 2012, and Paul Tappan who joined in 2015, and together they have over 50 years of retail and logistical experience. The company is still supplying the same quality products to its many loyal customers in the greater Cape Town area.

In addition to the Exitol range of cleaning chemicals and products, the company has a comprehensive range of **Other Products** such as paper products, brush ware, hardware, protective clothing, scouring pads, electric bulbs, refreshments, household branded products, and many other cleaning requirements. The company also offers expert advice on tackling any cleaning problems.

The goal behind the basket of offerings that CICS specialises in is to ensure that the customer has a wide selection of top quality products to choose from and to offer a one-stop solution for its customers'. This affords you, the customer, the opportunity to concentrate on what is important to your business knowing that all your cleaning and everyday requirements are handled by a competent and professional team of experts that operate on that next higher level of customer satisfaction and expectation.

- Car Wash & Wax / Silicone
- Tile & Grout Cleaner

Exitol Products

Black Disinfectant

This is a top quality, liquid disinfectant with a strong odour that is designed for use by households, schools, public conveniences, sanitary inspectors, mines, industrial organisations and other outlets where efficient disinfecting of inanimate objects like drains, rubbish bins, etc. are a necessity. It mixes easily forming a stable emulsion with either hard or soft water. It is effective against most bacteria.

Bleach

This is concentrated bleach that has a four-point action plan. It bleaches, disinfects, deodorises and sanitises. It should only be used on cottons, linens, whites and fast colours. If in any doubt test on a small piece of the material first. Do NOT use on nylon, wool, satin, and leather or waffle pique.

Germosept

This is a yellow, specialized, laced, long lasting, fragranced detergent and disinfectant. It effectively kills most germs and bacteria as well as imparting a pleasant fragrance. In addition to its effective cleaning abilities, it also has excellent reagent and preservative properties.

Odour mask

This is a very highly concentrated disinfectant containing a powerful aromatic hydrocarbon as well as perfumes that do not cover up mal odours, but destroy them. It also contains naphthalene, which assists in the process by absorbing the mal odours from the air, which are then destroyed. This product is highly recommended for use in and around high traffic and highly pungent areas. E.g. public toilets, sewers,

Fabric Softener

This is a quality grade fabric softener, similar to those found on supermarket shelves. Added to the final rinse cycle it leaves washing soft and fluffy, as well as pleasantly fragranced. Can be used for machine wash – in twin tubs, top and front loaders, as well as for hand washing.

QAC Detergent

This is an all-purpose, non-perfumed detergent disinfectant cleaner. This product has been specifically designed to be non-fragranced, as perfumed cleaning products taint meat and other food stuffs by allowing bacteria and enzymes to react rapidly causing loss of revenue, productivity and company image. This is of particular concern to businesses dealing with meat, fish and other food related industries. QAC combats all of this whilst still offering you excellent and effective general purpose cleaning.

Detergent

This is a high-grade, neutral detergent which contains a scientific blend of surfactants, both non-ionic and anionic, to achieve maximum cleaning ability. It not only has high foaming properties coupled with free rinsing properties, but it also contains hand softening agents to ensure complete user friendliness. Perfect for use on practically any hard surface that requires cleaning.

Multi Ammonia Clean

This is a viscous white-coloured ammoniated abrasive cleaner designed to remove stubborn dirt from hard surfaces in both household and industrial applications without scratching. It combines the powerful cleaning action of a scouring medium and ammonia into a liquid hard surface cleaner thus making the product highly effective. It is easy to work with and is extremely popular due its similarity to other well-known brands

Tolpine Pine Disinfectant

This is a brown, long lasting, fragranced detergent and disinfectant. It effectively kills most germs and bacteria as well as imparting a strong pleasant pine fragrance.

Easy Iron

This is a new type of fabric softener that reduces ironing by up to 80% on average because it has the advantage of being a silicone-based product. Ironing is now easier and takes less time and effort thanks to Easy Iron Soft's unique fibre moisturisers. It causes fewer creases during washing and even lowers the ironing temperature on difficult to iron fabrics such as 100% cotton and linen.

Bleach Colours

This is a free flowing white powder designed to brighten and remove stains from clothes that otherwise could not tolerate the normal liquid bleach. It can be used as a pre-soaker as well as an active washing powder additive.

High Foam

This is a free flowing blue powder designed to clean all types of laundry - both household and industrial. Being high foaming it is predominantly designed for hand use, but may also be used in twin tub machines for those who think that seeing foam is evidence of a product working. Our high foam powder contains all the necessary surfactants; detergents as well as optical brighteners to ensure a clean and efficient wash, time and time again.

Low Foam

This is a free flowing white powder designed to clean all types of laundry - both household and industrial. Being low foaming it is predominantly designed for machine use, but may also be used by hand. Our low foam powder contains all the necessary surfactants; detergents as well as optical brighteners to ensure a clean and efficient wash, time and time again.

Oxygen Bleach

This is a free flowing white powder designed to brighten and remove stains from white materials that otherwise could not tolerate the normal liquid bleach. It can be used as a pre-soaker as well as an active washing powder additive.

Speckles Washing Powder

This is a free flowing white powder with added active blue speckles, designed to clean all types of laundry - both household and industrial. Being medium foaming it is can be used for both machine and hand use. Our powder contains all the necessary surfactants, detergents as well as optical brighteners to ensure a clean and efficient wash, time and time again

Concentrated Dishwasher

This is a quality, pleasantly fragranced, neutralised dishwasher detergent, which contains a scientific blend of surfactants both non-ionic and anionic, to achieve maximum cleaning ability. It not only has high foaming properties coupled with free rinsing properties, but it also contains hand softening agents to ensure complete user friendliness. Guaranteed to leave crockery and glassware clean and streak free.

QAC Detergent

This is an all-purpose, non-perfumed detergent disinfectant cleaner. This product has been specifically designed to be non-fragranced, as perfumed cleaning products taint meat and other food stuffs by allowing bacteria and enzymes to react rapidly causing loss of revenue, productivity and company image. This is of particular concern to businesses dealing with meat, fish and other food related industries. QAC combats all of this whilst still offering you excellent and effective general purpose cleaning.

Maxikleen

This is a top of the range solvent type cleaner. It has been designed for very dirty surfaces containing grease, oils and stubborn dirt. Solvents generally loosen and remove a different type of soiling compared to detergents. Maxikleen contains both and therefore one receives the best of both worlds. A detergent and solvent product in one. If ever in doubt which product to recommend for a job – always choose Maxikleen.

Oven Cleaner

This is a highly concentrated caustic solution with built in surfactants and cleaners. It has very high soil removing qualities, particularly on fats and carbons. As well as an excellent oven and grill cleaner, this product can also be used on any fatty / carbonised areas that require cleaning. Being very low foaming it can also be used through certain types of cleaning systems.

Window Cleaner

This is a concentrated alcohol-based window cleaner with added ammonia. Ideally used through a trigger spray application it gives streak free results on items such as windows, glassware, etc.

Pine gel

This is a thick, green, clear and freestanding gel with natural germicidal properties. It contains a high concentration of surfactants, as well as pine oils, which act as a natural disinfectant making this an excellent universal all round cleaner and disinfectant.

Toilet Bowl Cleaner

This is an acid based stainless steel urinal cleaner. It contains wetting agents and penetrants for removing unsightly rust stains, hard water salt deposits and uric acid deposits from urinals and toilet bowls.

Blue Hand Soap

This is a high foaming, high-grade hand soap. It contains fragrance, an emollient and a soluble cleaner. It acts against most common everyday soils, fats, grease oil, ink, etc. without resorting to harsh alkalis or abrasives. It has a neutral pH and ensures the skin remains healthy and moist even after repeated applications. This product is specifically designed for use in dispensers and is recommended for use in toilets, hotels, kitchens, restaurants, and butcheries etc.

Pink Hand Soap

This is a high foaming, high-grade hand soap. It contains fragrance, an emollient, and a soluble cleaner. It acts against most common everyday soils, fats, grease oil, ink, etc. without resorting to harsh alkalis or abrasives. It has a neutral pH and ensures the skin remains healthy and moist even after repeated applications. This product is specifically designed for use in dispensers and is recommended for use in toilets, hotels, kitchens, restaurants, butchers and other industries

Hand Cleaner

This is a white, waterless hand cleaner containing an emollient, skin conditioners and a soluble scrubber. It acts against the heaviest soils, e.g. fats, grease, oil, ink, etc. without resorting to harsh alkalis and / or abrasives.

Grit Hand Cleaner

This is a blue, waterless hand cleaner with grit containing a skin conditioner, an emollient and a soluble scrubber. It acts against the heaviest soils, fats, grease, oil, ink, etc. without resorting to harsh alkalis and /or abrasives.

Anti-Bacterial Hand Soap

This is a thick, opaque green liquid for use in soap dispensers. It also contains anti-bacterial agents and is ideal for use in hospitals, veterinary clinics, kitchens, etc.

Floor Cleaner

This is a heavy duty, ammoniated floor cleaner for floor tiles, linoleum and cement. It is primarily designed for the removal of wax polishes and polymer coatings. As with any ammonia based products, always use in well-ventilated areas.

Vinyl Tile Polish

This is a highly concentrated polymer floor dressing for vinyl and other plastic floors, which imparts a hard, shiny, non-slip surface after each coating.

Chlorinated Floor Powder

This is a white, free-flowing powder containing stabilised chlorine as a sterilizer for the cleaning of all hard surfaces where cleaning and sanitising is required. Ideally used in the food, dairy, etc. industries.

Maxikleen

This is a top of the range solvent type cleaner. It has been designed for very dirty surfaces containing grease, oils and stubborn dirt. Solvents generally loosen and remove a different type of soiling compared to detergents. Maxikleen contains both and therefore one receives the best of both worlds. A detergent and solvent product in one. If ever in doubt which product to recommend for a job – always choose Maxikleen.

Pine Gel

This is a thick, green, clear and freestanding gel with natural germicidal properties. It contains a high concentration of surfactants, as well as pine oils, which act as a natural disinfectant making this an excellent universal all round cleaner and disinfectant.

Stripper

This is an ammonia and solvent based liquid floor stripper. It is designed for the removal of wax polishes and polymer coatings from floors. Due to its high ammonia content this product effectively removes all types of polishes / waxes.

Car Products

Tyre Black

A high-grade tyre blackener, designed for the automotive industry. To be applied to tyres after cleaning, to impart the "new tyre" look. Blackens the tyre without leaving any sticky residues or unnatural looking shine or gloss. Unlike other brands, it will not attract dirt / dust.

Car Wash & Wax

This is a dual-purpose exterior vehicle cleaning detergent liquid. It contains powerful soil removing agents together with a special soft emulsified wax that will leave a durable lasting shine even to old type vehicles. This product is caustic free, high foaming with a built in non-irritating skin protector. It is designed to replace the small amount of wax, which is removed from the normal washing of a vehicle. It can be used with either warm or cold water. It can be applied by hand or through automatic washing devices.

Mag Wheel Cleaner

A liquid aluminium cleaner and brightener for aluminium and stainless steel wheels / spokes.

Silicone – Oil Based

A solvent based silicone fluid, which contains high levels of silicone oil. It can be used on all plastic / vinyl / rubber parts of a vehicle which require cleaning and protection.

Silicone – Water Based

A very popular, thin, fragranced white silicone emulsion, which contains high levels of silicone oil. It is totally miscible with water and can be used on all plastic / vinyl / rubber parts of a vehicle which require cleaning and protection.

Carpet Powder

This is a white, dense powder with low foaming properties. It is ideal for use through a spray on vacuum type carpet cleaning machine.

Carpet Shampoo

This is a very high foaming liquid designed for use as a hand wash carpet cleaner.

Carpet Fresh

This is designed to bring a little life back to your carpet. It not only assists in the cleaning process when vacuuming but also leaves behind a very effective and pleasant odour. It is available in lavender, lemon, rose, pot pourri and odour neutraliser.

Carpet Cleaner

This is a thin, pink liquid with low foaming properties. Ideal for use through a "spray on and vacuum up" type carpet-cleaning machine.
